

Lab 4 feedback – Stereoacuity

Class results

Mean stereacuity thresholds

- Using Howard-Dolman apparatus, Method 1 (in to out): 40"
- Using Howard-Dolman apparatus, Method 1 (out to in): 20"
- Vectograph fly book: 50"

Stereo champs

- Method 1: Sean = 13"
- Method 2: Chad and Jeff 2"

Monovision (+1.50D)

- In most cases worsened stereoacuity threshold by 1.5 to 2x
- In some cases didn't affect threshold
- In one case, monovision improved stereoacuity!
